

HS HTM Furniture

HS HTM Furniture & Worktops

Carella is proud to have completed the fitout of many major hospitals. Manufacture of furniture at our factory is always to the highest standard, but in addition government recommendations laid out in HTM 63 are relied upon to provide ergonomic yet durable and hygienic unity and work surfaces for healthcare projects.

If a particular situation is not clearly covered by the recommendations Carella will adapt and design the furniture to suit the client's needs all within the scope of HTM. This may include cantilevered, fixed or suspended furniture, high and low level storage and use of allied products such as Toprail or Bisley in different areas such as dispensaries, pharmacies or theatres. Careful attention is paid to work surfaces, making use of lino, laminate or solid surfacing where appropriate.
