

HS Reception Desks

HS Reception Desks

It is only possible to show a small selection of the wide and varied reception desks already installed in various facilities by Carella. Often the specifier's initial thoughts will be adapted to provide practical details, allowing for electrical and mechanical services, cable management and facilities for integrated computer terminals.

Through our drawing office Carella can make use of CAD to design and manufacture reception desks, using varied finishes and materials, not only laminate and veneer, but also glass, stainless steel, solid surfaces and lino, granite and solid timber. A thoroughly bespoke service.
