

HS Toprail & TR2

HS Toprail & TR2

Carella Laminate Systems are agents throughout Ireland for Toprail Systems. This simple yet versatile furnishing system was originally designed for the healthcare area. Now Toprail is used in many commercial, industrial and educational areas as well as almost every hospital in the UK and Ireland where flexibility, quality and cost effectiveness are demanded.

Only the top rail is fitted to the wall all other components, cupboards, worksurfaces and shelves hang from the rail. Final positions of these items can be decided by the end user, and alterations or additions are easily made as working practices change.

TR2 is a new product in the Toprail Range, designed more with a comfortable, very practical and stylish office environment in mind but with all the benefits of Toprail System.
