

QB Executive

QB Executive enhances the QB Range with the introduction of finer details and options to provide the specifier with a greater opportunity to create an impact. In addition to the standard features found in QB Concept 2, the Executive offers the latest powder coated ironmongery and a distinctive, more substantial postformed headrail. In common with the full QB Cubicle Systems Range, QB Executive can be used in conjunction with the QB Integrated Panel Systems to produce a complete colour co-ordinated area.

QB Executive	Technical Details
